

PADI SPECIALTY - DRY SUIT DIVER

Experience the joy of diving dry! Some of the world's best diving, including Minnesota, is in waters that are a bit chilly. Dry suits make these waters accessible while keeping you warm and comfortable.

This specialty class is designed to be a safe, supervised introduction to dry suit diving. You will go to the pool where you will practice proper weighting, buoyancy control, ascent and descent techniques and emergency procedures. After the pool dive, you'll make two open water dives where you'll apply the skills and techniques that you learned in the pool. After taking this class, you may never want to dive in a wet suit again!

Upon completion you will earn the PADI Dry Suit Diver certification. This class counts toward the Master SCUBA Diver rating. Master SCUBA Diver is the highest non-instructional classification in the PADI system of diver education. For this level of achievement you must have 50 logged dives and hold PADI Rescue Diver certification along with five PADI Specialties.

Class Includes:

- PADI Dry Suit Diver Manual and Video
- Certification Processing
- Certification Photo
- Air Fills

Pre-requisite:	PADI Open Water Diver certification or equivalent
Minimum Age:	12
Class Fee:	\$129.00

This class is offered as a private class. Contact us for more details!

SCUBA Equipment is NOT included, but may be rented at HALF PRICE.
