

TDI TRAINING - ADVANCED NITROX

This class examines the use of EAN 21 through 100% (oxygen) for optimal mixes to a depth of 130fsw/40msw. The object of this class is to train divers in the benefits, hazards and proper procedures for utilizing EAN 21 through 100% (oxygen) for dives not requiring staged decompression. Decompression Procedures may be combined with this class at the discretion of the instructor.

Upon successful completion of this class, graduates may engage in diving activities utilizing EAN 22 to EAN 100 without direct supervision for dives not requiring staged decompression.

Class Includes:

- TDI Manual and table
- Certification Processing

Pre-requisite:

- TDI Nitrox/Enriched Air or PADI Enriched Air (Nitrox) certification
- Proof of 25 logged open water dives, or equivalent at the discretion of the instructor, in the environment in which the class is being presented

The instructor has final approval authority on accepting anyone into the class even though minimum prerequisites have been met.

Minimum Age: 18

Class Fee: \$349.00*

Class Schedule: For most current schedule, contact the shop or visit www.AirDownThere.com

Required Equipment:

- Alternative second stage ("octopus") attached to a primary regulator or a redundant SCUBA unit (13 cf minimum).
- A submersible pressure gauge.
- Depth gauge and automatic bottom timer and/or dive computer.
- Buoyancy compensator with power inflator.
- Exposure suit adequate for the open water environment.
- Cylinder and regulator properly labeled and cleaned as required for EAN mixtures.
- Access to oxygen analyzer (instructor may supply).

Equipment and Gas Fills are the responsibility of the student.

*Combine this class with TDI Decompression Procedures for only \$629!
